CG Model Number nomenclature:

Materials used in the pumps are based on the fluid to be handled and are indicated in the model number nomenclature.

- (1): Indicates the number of stages for the rotor and stator
- (2): Indicates the pump model designation (CL, CM, CG Model)
- (3): Indicates the size of the rotor and stator
- (4): Indicates the pump body casting material
- (5): Indicates the rotor and internal parts material
- (6): Indicates the stator material

Continental Part Description	Continental Letter Designation	Part Materials
Pump Body	C	Cast Iron
	S	316 Stainless Steel
Rotor	D	Chrome Plated Alloy Steel
	S	Chrome Plated 304 Stainless Steel
Stator*	Q	Buna Nitrile
	R	Natural Rubber
	B	EPDM
	F	Viton
Internal Parts	CS	Carbon Steel
	S	Stainless Steel

*The Stator Elastomers can be furnished in either: C – Carbon Steel Sleeve or S – Stainless Steel Sleeve.

Example: QC is for Buna Nitrile Elastomer with Carbon Steel Sleeve.

Packing Sets: All sets are Formed and Cut Rings.

Teflon coated: General Service to handle are Caustics, mild acids, chemicals, solvents, oils. Temperature to 300°, pH range 2-10.

Graphite: General Service to handle are Strong caustics, acids, chemicals and high pressure steam. Temperature to 1200° in steam and 800° in oxidizing atmospheres, pH range 0-14.

CG Model

Replacement Kits for CG12 Pump

Part	Part Name	Continental Pump Part Number	For Continental Pump Model	List Price
	<u>Roller Bearing Assembly:</u> Includes: Qty 1: Inner Race, Outer Race; Qty 2: Cone & Cup	CL12-31	CG12	\$1,301
	<u>Gear Joint Kit:***</u> Includes: Qty 1: Connecting Rod Cover, Con Rod Nut, Shaft Lock Washer, Ball Gear, Ring Gear, Thrust Plate-Front, Thrust Plate- Rear, Spacer, O Ring; Qty 2: Shaft Key.	CG12-195K	CG12	\$1,637
***Gear Joint Kit repairs <u>ONE</u> gear joint.				
	<u>Component Seal Kit:</u> Includes QTY 1: Viton Component Seal & Stainless Steel Gland	CL12-81KFS	CG12	Contact Us

Materials of Construction

All Continental Pump casting materials are Class 40# grey cast iron and CF8M (316) stainless steel. The best metal for your application would depend on how corrosive your liquid is. We offer an epoxy coating for an additional charge and can be applied to the suction housing and reducer. The epoxy seals the cast iron from the material being pumped.

Stators are available in 4 types of elastomers. The rubber materials are: Buna, Natural Rubber, EPDM and Viton. The rubber that is best for your application depends on what liquid you are pumping and at what temperature, as it plays a vital role in which to select.

The rotors are available in Chrome Plated Alloy Steel and 304 Stainless Steel, but is dependent on the pH level and how corrosive the liquid is. In certain pH levels a non plated rotor may need to be used, as it could lift the chrome off of the rotor.

Looking for simplicity? We offer complete Progressive Cavity Pump Units. They are constructed on a steel base to fit your specific application needs. The Unit consists of a Pump, a Steel Base & Guard, a Gear Reducer and Motor. Also available are Belt Drive Units and many other base options.

Space Challenged? If you are needing a different arrangement from traditional piping, we can rotate the housing up to 270° for the CL, CM & CG Model Pumps.

Don't need a complete pumping unit but looking for drive options? We can still help, whether attached to a pump or sold separately we can supply you with Hydraulic Adapters, VFD's, Gear Boxes and Motors.
